

FOR IMMEDIATE RELEASE

Open Spatial Announces Release of Munsys Ai 10.6

Australia, Sydney, 30 September 2013—Open Spatial today announced the release of Munsys Ai 10.6. This release offers compatibility with Autodesk 2014 versions of AutoCAD® Map 3D and AutoCAD® Civil 3D, AutoCAD® and Autodesk® Infrastructure Design Suite—Standard, Premium, Ultimate.

Munsys Ai 10.6 has passed the rigorous QA cycle employed by the Open Spatial development team on the most recent AutoCAD and Oracle products, allowing customers to enjoy the benefits of the latest AutoCAD releases without any productivity interruptions.

The continued provision of compatible versions is one of the benefits of buying a “commercial off the shelf” solution such as Munsys Ai. The Munsys Ai 10.6 version is available for download by customers who are participating in the Software Upgrade Subscription program.

The Open Spatial solutions include a central database with pre-defined Oracle Locator/Spatial data models and integrated applications for the management of water, sewer, drainage, cadastral, roads and electricity infrastructure. Autodesk design products are utilised for spatial data creation and editing.

Customers interested in improving the speed and quality of CAD and GIS data through better utilisation of existing Autodesk products should send an enquiry email to info@openspatial.com.

About Open Spatial

Open Spatial provides geospatial engineering solutions for managing spatial data from survey through design, construction and data management. Our technologies are based on risk-averse ubiquitous platforms and bridge the gap between CAD, GIS, BIM and asset management applications. Utilising open standards and engineering best practices, we deliver fit-for-purpose solutions with a focus on productivity improvements, definable return on investment and long-term savings.
